

Elixir's Diabetes Management Solution Helps Members Achieve Better Overall Health

Diabetes is a chronic and widespread condition that affects over **37 million Americans**. While it is a common disease, diabetes can be a confusing diagnosis and involve many medications. It takes a multi-faceted approach to address the appropriate level of care for a member's unique healthcare needs.

Elixir's **Diabetes Management Solution** provides better coordination, personalized services, and stronger engagement through education, resources, and one-on-one interactions with members. These interactions drive member engagement, which can lead to better outcomes and lower cost of care for members and plan sponsors.

The impact of diabetes goes beyond its immediate effects

A leading cause of health complications, including heart disease, stroke, kidney failure, blindness and lower limb amputation.

8th leading cause of death in the U.S.

\$1 out of every \$4 in healthcare is spent on diabetes.

Diabetes care that puts the member first

Elixir's **Diabetes Management Solution** aims to optimize cost savings and promote medication and treatment adherence. We do this by looking at the overall needs of the diabetic population, and then we use that information to focus in on the unique health of a member. By connecting the key components of our program with our goals to coordinate, personalize and engage, we are creating care that gives an advantage to the member's health.

Personalized Approach

caters to a member's specific circumstances

Member Education

promotes long-term success in managing diabetes

Investment in Self Care

leads to improved health outcomes for the member

Clinical Resources

support a member's appropriate medication use

Care Coordination

connects physicians, pharmacies and the member

Member Incentives

reinforce behaviors, improve health outcomes and drive cost savings

Elixir's Diabetic Management Solution is based on foundational pillars that change the way members manage their diabetes and experience healthcare.

Better coordination

Members benefit from improved access to essential equipment, reduced medication costs and copays, innovative treatment approaches and expanded coverage for additional healthcare products.

- \$0 preferred glucometer
- Convenient home delivery
- \$0 copay on first fills

Personalized Services

Members can prioritize their healthcare and make informed decisions with the help of education and messaging on health and wellbeing, diabetes education and helpful reminders.

- Medication and disease-state education
- Healthy recipes and movement goals
- Notifications for refills, foot checks and eye exams

Stronger Engagement

Members can improve outcomes with medication reviews and clinical interventions that help offset duplicate therapy, formulary conversions, medication adherence and the GLP-1 drug class.

- Review and optimize diabetic medication therapy
- Pharmacist-driven comprehensive counseling
- Risk assessment tools and support guidance

Measuring success

With our dedicated support and comprehensive resources, Elixir keeps members actively involved in their treatment and drives lower costs for the member and the plan.
