Reach for the Stars: A Mix of Solutions to Help Improve CMS Star Ratings

Managing the many Medicare Star Rating measures with ever-changing cut points can be a difficult task

46 Star Measures[1]

14 Part D Star Measures[1]

64% of the MA-Part D* measures scored a national average less than 4 Stars[1]

The Right Tool to Help You Shine Brighter: Improve Member Care and Star Ratings

Elixir's Stars Targeted Analytics & Reporting (STAR) tool provides on-demand actionable insights:

Stars Estimator
Evaluates current Star scores and determines the gaps to the next highest and lowest cut points

Real-time estimates of Star ratings so you can make positive changes

Member Fill Rate Monitoring
Tracks potential over- and under-utilization of medications by subclass

Determine if interventions may be needed

Opioid Overutilization Monitoring
Tracks over utilization of opioids and identifies at-risk members based on CMS criteria

Minimize opioid misuse and abuse

Prescription Drug Event (PDE)
Reviews claims compared to operational and financial PDE results and tracks claim aging and rejections

Improve oversight and prioritize high-impact rejects

Part D Adherence Member Outcomes Reporting
Tracks adherence rates for members using diabetes, hypertension and cholesterol medications, as well as diabetic statin usage

Determine if crucial interventions may be needed

The STAR tool puts the solution to achieving stellar Star ratings right at your fingertips.
