

Get the select medications you need at prices you can afford.

Many prescription benefit plans do not cover select drugs, including those for acne, weight loss and smoking cessation. Yet paying full retail price can sometimes put these medications out of reach.

Discounts as high as 65% on select medications

Your employer cares about your health and well-being and has added the Personal Savings program to your prescription benefits. This means you can now receive discounts on many select medications that are important to you. There are no enrollment forms to fill out, claims to send in or discount cards to carry. Simply use your existing prescription Member ID card to reap the savings—as much as 65% off retail prices—at the pharmacy counter.

For more information, contact your Human Resources Department.

Over-the-counter medications may have lower cost alternatives, so check with your pharmacist to ensure you receive the best discount.

Sample list of included medications

Some of these drugs may be covered in your prescription benefits. Check your plan for details.
