

Formulario National EX Abreviado 2022

La siguiente es una lista de los medicamentos genéricos y de marca que se recetan con más frecuencia. Representa una versión abreviada de la lista del formulario que es el núcleo de su plan de beneficios de medicamentos recetados. La lista no es exhaustiva y no garantiza cobertura. Algunos medicamentos preferidos se superponen con otros programas clínicos y es posible que no estén cubiertos. Además de los medicamentos de esta lista, la mayoría de los medicamentos genéricos están cubiertos por su plan y le recomendamos que le pida a su médico que le recete medicamentos genéricos siempre que sea apropiado. El comité de Elixir Pharmacy & Therapeutics (P&T) es responsable del desarrollo y mantenimiento del formulario. El comité está compuesto por médicos y farmacéuticos independientes de una amplia variedad de especialidades médicas. El formulario se revisa y actualiza a medida que se encuentran disponibles nuevos medicamentos o nueva información de prescripción. Los factores que afectan las decisiones con respecto al formulario incluyen uso seguro, eficacia clínica y necesidad terapéutica. Solo después de evaluar esos factores se considera el costo. El cumplimiento del formulario es importante para mejorar la calidad de la atención y restringir los costos de atención médica. Una copia de este documento del formulario está disponible en elixirsolutions.com.

NOTA: Los medicamentos de marca preferidos pueden pasar a ser no preferidos si se dispone de una versión genérica durante el año. Cualquier medicamento recientemente aprobado por la FDA no será cubierto hasta que sea revisado por el Comité de Farmacia y Terapéutica (P&T) de Elixir. No todos los medicamentos enumerados están cubiertos por todos los programas de beneficios de medicamentos recetados. Es posible que se apliquen determinadas modificaciones y criterios de utilización. Si tiene preguntas específicas sobre su cobertura, visite elixirsolutions.com.
