

# Formulario National EX Abreviado 2024

La siguiente es una lista de los medicamentos de marca y genéricos más comúnmente recetados. Representa una versión abreviada de la lista del formulario que es el núcleo de su plan de beneficios de medicamentos recetados. La lista no es exhaustiva y no garantiza la cobertura. Algunos medicamentos preferidos se superponen con otros programas clínicos y es posible que no estén cubiertos. Además de los medicamentos en esta lista, la mayoría de los medicamentos genéricos están cubiertos por su plan y se le recomienda que le pida a su médico que le recete medicamentos genéricos cuando sea apropiado. El Comité de Farmacia y Terapéutica (P&T) es responsable del desarrollo y mantenimiento del formulario. El comité está formado por médicos y farmacéuticos independientes de una amplia variedad de especialidades médicas. El formulario se revisa y se actualiza a medida que se dispone de nuevos medicamentos o de nueva información de prescripción. Los factores que afectan las decisiones relativas al formulario son el uso seguro, la eficacia clínica y la necesidad terapéutica. Sólo después de evaluar estos factores se considera el costo. El cumplimiento con el formulario es importante para mejorar la calidad de la atención y contener los costos de la atención de salud. Una copia de este documento del formulario está disponible en [elixirsolutions.com](http://elixirsolutions.com).

NOTA: Los medicamentos de marca preferidos pueden pasar a ser no preferidos si aparece una versión genérica durante el año. Un medicamento recientemente aprobado por la FDA no estará cubierto hasta que sea revisado por el Comité de Farmacia y Terapéutica (P&T). No todos los medicamentos enumerados están cubiertos por todos los programas de beneficios de medicamentos recetados. Es posible que se apliquen ciertas ediciones y criterios de utilización. Si tiene preguntas específicas sobre su cobertura, visite [elixirsolutions.com](http://elixirsolutions.com). **Efectivo 5/1/24.**
